

Product Code . JE-ME-10730

Industrial Waste Incinerator

Description

Industrial Waste Incinerator

Description:

Industrial Waste generated by Industries and Businesses:

Metal Manufacturing Sludge containing, Heavy metals, cyanide waste, paint waste

Construction Industry Ignitable paint waste, spent solvents, strong acids and bases

Paper Industry Paint waste containing, heavy metals, ignitable solvents

Leather Industry Toluene and Benzene

Petroleum Refining Industry Wastewater containing, benzene and other hydrocarbons etc.

Capacity

100/200/250/500/1000/1500/2000 Kg/day

Control

Fully automatic sequential control provided by internal PLC system providing control of:

Primary Chamber

LPG

cool down cycle

Secondary chamber pre-heat

burn cycle (variable)

Fuel Options

Diesel

Natural Gas

Electrical

Temperatures

Main chamber: 750°C – can reach in excess of 1000°C*

Secondary chamber: 850°C – 1100°C

Burners

Fully automatic, high-efficiency burners with electronic ignition, flame recognition and combustion control devices fitted.

Construction

Steel welded fabrication consisting of sheet steel and structural section supports.

Ash Removal

Easy and safe manual ash removal from the primary chamber (ash doors available on request).

Scrubber

Air Pollution Control Device.

Features:

Stainless steel flue as standard

Solid hearth to allow maximum burnout

Automatic and simple to operate control panel

PLC based control panel.

Afterburner fitted as standard

Easy on-site installation

Low running and maintenance costs

Industrial Waste Incinerator Manufacturer, Industrial Waste Incinerator Suppliers, Industrial Waste Incinerator India, Industrial Waste Incinerator Exporter, Medical Equipment, Industrial Waste Incinerator, Hospital Instruments, Waste Incinerator Suppliers, Waste Incinerator Manufacturer, Medical Instruments, Waste Incinerator Exporters in India.
