

Product Code . JE-ME-10736

Plastic Shredder

Description

Plastic Shredder

Description:

Plastic waste shredder is recycling process that needs to have the right skill and equipment in order to perform.

Plastic Waste Shredder is the advanced recycling technology, composting, that has undergone numerous is based on natural biodegradation.

For this reason, composting is used for processing waste with organic origin.

Plastic is used and become waste; recycling process is applied to return it to a usable product.

Specification:

Capacity: 5/10/20/25/50/150/200/250/500 Kg.

3/4 HP conveyor motor | 5 HP crushing motor

All steel construction

conveyor hopper

Steel casters

External tail-pulley adjustment

Feature:

Auto reverse features with PLC control (optional)

Solid body structure and casing

Low budget machine

Heavy duty gear

Maintenance gear

Unit is protected against overloads and equipped with fuses

Low noise level

Pneumatic feed control (optional)

Plastic Shredder Manufacturer, Plastic Shredder Suppliers, Plastic Shredder India, Plastic Shredder Exporter, Medical Equipment, Plastic Shredder, Hospital Equipment, Shredder Exporters, Shredder Manufacturer, Hospital Instruments, Shredder Suppliers India.
